

SLIDE EXAMPLE

# LEVER

$$F_A = 0.155\text{kg} * 9.81\text{m/s}^2 = 1.52\text{N}$$

$$F_M = 0.233\text{kg} * 9.81\text{m/s}^2 = 2.29\text{N}$$

SLIDE EXAMPLE

# LEVER

“ **Mechanical Advantage:**

. Ideal MA =  $63\text{cm}/37\text{cm} = 1.7$

“ **Efficiency:**

. Actual MA =  $(2.29\text{N}/1.52\text{N}) = 1.51$

. AMA/IMA =  $(1.51/1.7)*100 = 89\%$
