

GUIDELINES TO THE CONCLUSION

This section may use person pronouns. There are six main things you should cover in this section

- 1) Whether or not you accept or reject your hypothesis
- 2) Why you think the data agrees or disagrees?
- 3) What was your percent error?
- 4) What was your numerical answer (if there is one)?
- 5) Problems that occurred during the experiment
- 6) What would be the next step, or how you could improve the experiment for it to work better?
